

## Alice Foo

1<sup>st</sup> year undergraduate Computing Student

“I’m interested in learning the frontend and the behind the scenes backend and how it all ties together”

**Background:** A-Level in Digital Technology which focused more on project management than programming

**Computer skills:** Intermediate

**Devices Used:** Mobile, Laptop

Alice is a new undergraduate student who worked on projects to learn programming basics over the Summer to help bridge the gap between their A-Levels and university so they can hit the ground running and ensure they are a top candidate for scholarships, internships, and graduate role opportunities.

### Technologies used:

- HTML & CSS
- JavaScript
- Java

### Alice’s Goals:

- Stay up to date with new technology
- Have something to show for her independent learning
- Gain an understanding of how all the cogs in a software project machine work
